

Energetic Life Filters

Energetic Life Filters (ELFs) are used to cleanse the body and the atmosphere of lower frequencies, such as those that are emitted from cell towers, phones, electrical substations, nuclear power stations, all of the electrical and computer equipment in the home or any other form of energetic pollution. Originally designed by Wilhelm Reich in the 1950s, The ELFs transmute the lower frequencies by pulling in the polluted energy through the base, filtering it up through the elements and sending out higher frequencies through the top which are more beneficial to Mother Earth and all her inhabitants.

Products

Sacred Space Generator (SSG)

The Sacred Space Generator affects an area the range of 2 miles (500 yards for the mini version). It is a cone-shaped form typically placed within the home about 5 inches in diameter at the base and 4-5 inches tall. The SSGs are designed to balance the energy within and around your home. SSGs are made of resin, active carbon, double terminated quartz crystals, pyrite, metal, copper, brass shavings.

Environmental Balancers (EBs)

The Environmental Balancers are a smaller version of the SSGs and are designed to be placed all over Mother Earth especially near transformers, substations, and nuclear power plants

in order to transmute the lower vibration energies emitted from them. They can be taken with you while traveling, hiking, driving to work, and either buried or placed where you feel guided. EBs have a 200-300 yard radius.
